

CORPORATE INSTALLATIONS

Audio visual systems and solutions have become a 'must-have' for all companies - big and small. From a portable projector for your sales team to a fully automated boardroom with audio visual and video conferencing, our team have the knowledge, experience and resources to provide the highest quality solution and after-sales service, at a competitive price.

Here are some of our corporate projects which show a range of AV solutions.

BOARDROOMS

Boardrooms are often the showpiece of an office and this one was no exception. Architecturally designed, our client needed an AV system to enhance the interior's modern look and be easy to use for meetings and entertaining alike.

An AMX control system with touch screen controls the lighting, blinds, 60" Plasma and Bose stereo system so it is easy for presenters to plug in and display their presentations. Videoconferencing has also been incorporated into the system, along with Foxtel and a high definition set-top box. Now there is no reason to miss an important Cricket Test or Olympic event!

Our commitment to quality products, professional installations and a commitment to exceeding our customers expectations are the reasons for our success.

FUNCTION ROOMS

Caulfield Racecourse decided they needed to update and improve their facility's appearance and functionality.

Small TV monitors were replaced with large plasma screens in various rooms and general areas, presenting a more professional look and giving patrons improved viewing even when they're standing 10 deep! And to better cater for corporate events, plasmas were also installed in function rooms so companies could easily plug in a laptop and run their presentations.

MEETING ROOMS

The Good Guys were looking for a user-friendly, cable-free system that would allow their two adjoining meeting rooms to operate separately or as one large room.

The solution involved two projectors and screens, sound system, DVD/VCR, lighting and automated blinds. The AMX control system provides intuitive and user friendly control of their entire system.

Our commitment to quality products, professional installations and a commitment to exceeding our customers expectations are the reasons for our success.
