

Dear Wayne,

I am pleased to provide this testimonial for InSight Systems who recently partnered with us for a major Audio Visual integration

From the outset of the project, the team at InSight Systems demonstrated true professionalism. Wayne Schultz designed the system which included multiple projectors, screens and control systems. Wayne's commitment to understanding our needs and expertise in system design has delivered an AV system that has exceeded our expectations which is in use 24 hours a day.

We found the InSight Systems team has extremely high standards and this has been evident in the quality of the installation. In fact our staff is very impressed by how flawlessly the equipment has been installed.

The customer service we received from Wayne and the entire team involved in the project was outstanding – we know we only have to make a call and our questions or issues will be resolved.

It has been our pleasure to work with InSight Systems and we have no hesitation in recommending InSight to any other prospective clients.

Kind Regards,

Kimo Wassef
